To whom it may concern:

AUBI was contracted by our firm to construct a new LEED Certified Data Center in Chatham, Ontario.

Over the course of the Project, there were many changes and upgrades to the overall building envelope. AUBI worked very diligently and timely with the consultants as well as our own project personnel to ensure that all LEED project requirements were adhered.

LEED Gold was obtained through the co-ordination of all parties, which illustrates that they can successfully work in a team environment.

We wouldn't hesitate to recommend AUBI as a qualified proponent for any future building construction and LEED projects.

Yours Truly

Hugh Bridgen
Director of Metering and Technical Services
