To whom it may concern.

This Letter is in reference to the construction of the Oxford Operations Centre performed by Agri-Urban Buildings Inc. June 2010 to January 2011.

Scope of work included the construction of a 4 bay repair garage with an attached Administration component, total square footage approximately 5000 Sq ft. and a “Coverall” Sand / Salt winter storage facility. Total Budget for this project was approximately \$3,000,000.00.

Agri-Urban Building Inc. was the successful bidder among six submissions. Bob Blommers from Agri-Urban was the project Manager on this project from start to finish. Bob managed the project in a professional manner from the coordination of sub-trades to working along with the consultants and the owner. Agri-Urban Building Inc. was an integral part in meeting the required time lines and budget associated with this project.

It was pleased to work with Bob and his staff at Agri-Urban Buildings Inc. and look forward to the opportunity again in the future

Sincerely,

Jeff Wilson – Technologist Architectural
