Attention: Ryan Kelly

Dear Ryan,

The project is nearing the end! What an amazing journey. What an amazing group of people you have working with Agri-Urban. How lucky we were to choose the perfect fit for building our new terminal.

Choosing a contractor can be a very hard task but prior to the bids, we had people come to us and suggest hiring your company because of the good work that you do. They didn't even know you had been put on the bidding list. Our engineers also had very good things to say about your company. Obviously having the engineers speak highly of your company has a lot to say about your company since they are backing you with their names. Everyone was right!

Thank you so very much for your professionalism, your talented team of guys that work with you and the contractors you picked to bring this all together. From the initial meetings to the actual building of our terminal and to our final walk around, you have been extremely attentive, you have reacted quickly and efficiently to any changes or concerns and this in turn has made this project fun and enjoyable.

Our building is beautiful and very well constructed. Your team of contractors reflect on the finished project. We just love it!

Once again, thank you for your special attention, your accessibility and your wonderful babysitting job from start to finish of our new terminal.

Sincerely,

Julie Quenneville, President  
International Carriers (Tilbury) Inc.
